Venture Construction Group certified as National Storm Damage Center Preferred Contractor

Reputable construction and restoration company obtains prestigious certification

Fairfax, Va. – Venture Construction Group, a leader in residential and commercial construction and insurance restoration and 24/7 emergency services, obtains Preferred Contractor Certification from National Storm Damage Center (NSDC).

In addition to providing construction, renovation and restoration services, Venture Construction Group has helped thousands of homeowners, commercial property owners, and property management companies recover from disasters and storm damage throughout the East Coast, Greater Mid-Atlantic Region; Gulf Coast, and Midwest including New York, Pennsylvania, New Jersey, Virginia, Maryland, Washington D.C., New Hampshire, Massachusetts, Rhode Island, Connecticut, West Virginia, Ohio, North Carolina, South Carolina, Georgia, Florida, Wisconsin, Illinois, Texas.

The National Storm Damage Center is an independent consumer advocacy organization founded to help homeowners affected by violent storms. NSDC provides an exclusive certification process for contractors to help homeowners connect with quality, reputable construction and restoration companies. Through free information, proactive home monitoring services, and post-storm advocacy and resources, the NSDC helps homeowners navigate the insurance restoration process.

“Venture Construction Group has been helping property owners throughout the nation for over 15 years. We have a very well-established reputation, and are proud to be an exclusive Certified National Storm Damage Center Preferred Contractor,” says Steve Shanton, CEO and founder of Venture Construction Group.

NSDC certification requires that contractors are properly licensed, insured, and the NSDC maintains a database of highly rated contractors experienced with storm restoration work. All NSDC certified companies must pass a thorough background investigation to gain the premier NSDC Preferred Contractor status.

“The NSDC certification brings a level of education, information and resources to property owners after major storms hit, and it connects them to licensed and certified contractors so they’re not being taken advantage of by storm chasers or an insurance carrier who attempts to reduce the amount of their claim or deny it altogether,” says Trevor Leeds, CEO of National Storm Damage Center.

Numerous residential and commercial property owners rely upon NSDC Preferred Contractor status when choosing their contractor to ensure quality and operational excellence. Through information, advocacy, and mediation, the NSDC is an independent third party that strives to streamline the process for homeowners, contractors, and insurance agencies.

The NSDC is known for its revolutionary forensic technology that detects the precise path, power and location of a storm in real time, whether it involves a tornado, hurricane, flash floods or a fierce baseball-size hailstorm. Their proven weather technology is geared to help property owners in a time of crisis and eliminate “storm chasers” taking advantage of consumers.

NSDC technology is trusted by many government entities and countries internationally. Taking their approval and certification process a step further, the NSDC recently signed an agreement with Global Risk Management Solutions (GRMS), the renowned leader in providing vendor screening solutions.

“GRMS provides innovative vendor screening solutions. As we grow the NSDC platform, it’s critical that we’re able to properly screen certified contractors in our network,” says Leeds.

According to the NSDC, they only certify the best and most experienced certified and licensed contractors, and their recent partnership with GRMS provides an added layer to vet storm restoration contractors and companies.

About Venture Construction Group

Venture Construction Group is a national leader in residential and commercial construction, renovations, insurance restoration, and 24/7 emergency services. We are a full-service general contractor and assist property owners with all of your construction and restoration needs.
